Monitoring the Plan

This section describes how the Trent Lands and Nature Areas Plan should be monitored to ensure it remains relevant and responds to emerging University needs while understanding the full scope of its social, environmental, and economic impact on the lands. A clear process for monitoring the Plan against campus planning outcomes will maintain the TLNAP as a living document, adapting to emerging and changing needs and academic and research directions.

As strategic initiatives move forward, the effectiveness of the Plan and its impacts will be monitored with opportunities for revisions to meet the challenges of the day, from playing a significant role in the regional, provincial, and national economic recovery in a post-pandemic world, to being leaders in the fight against climate change, and disseminating knowledge and research that contribute to change in how we manage the environment and reduce our ecological footprint.

20.1 Reporting Process

The University can monitor the success of the TLNAP through an assessment of its effectiveness in the planning process as well as its relevance and responsiveness to evolving University priorities. This could be measured through the use of key performance indicators to be reviewed by the Trent Lands Committee for infrastructure and development initiatives, and by the Finance and Property Committee for the UGN and Nature Areas.
